

Kekinua'taqn - Introduction Mi'kmaw Glides

Name: _____

Glides are **consonant–consonant combinations** that **create a different sound** when the letters are placed together. In their pronunciation, there are often small and subtle vowel sounds that can be heard, almost as if they are hidden within the blend. These **glides are organized according to their ending letter**, which may be **L, M, or N**, making them easier to group and study.

Mi'kmaw Glides M, L, N
